Profile

A motivated and collaborative final year software engineering student who always eager to learn. Competent to work both independently and in group on any projects, with a strong interest in Full-stack Development, Software Testings, UI/UX design and Artificial Intelligence.

Tech Skills

<i>Programming Languages:</i>	Java, JavaScript, Python
<i>Frameworks & Libraries:</i>	Spring, React, Vue.js, Django, Flutter, Tailwind CSS, OpenCV, Mediapipe, DeepFace
<i>Databases:</i>	MySQL, PostgreSQL, Firebase
<i>Testing Tools:</i>	JUnit, TestNG, Jest, Cypress, Pytest, Selenium, Postman, JMeter
<i>DevOps & Deployment:</i>	Git, Docker, Gunicorn, Nginx, Google Cloud, Linux VPS, Cloudflare
<i>Design & Tools:</i>	Figma, VS Code

Projects

Attendance Checking System (Individual Project) - React, Django, DeepFace (Sep 2025)

- Built a facial-recognition attendance app with Facenet model and geolocation.
- Deployed on Linux VPS using Gunicorn, Nginx, Cloudflare.
- Applied problem-solving skills to achieve the project.

Koalytics (Senior Project) - Django, React, Mediapipe, DeepFace (Jan–Aug 2025)

- Built a remote usability testing platform with real-time emotion recognition.
- Contributed as full-stack developer, collaborating with team members.
- Applied problem solving and critical thinking to combine computer vision with UX analysis.

MFU Hospital Website - Vue.js, Strapi (Aug–Dec 2024)

- Built hospital platform with headless CMS, and contributed by API integrations and frontend

Koala Tarot App - Flutter, Firebase (Jan–April 2024)

- Built fortune telling tarot reading app, and deployed to Google Play store

Ultimate Tic-Tac-Toe Website - Spring, MySQL, Google Cloud (Aug-Dec 2023)

- Multiplayer Ultimate tic-tac-toe web app, developed by gathering requirements with stakeholders.

Education

B.Eng. Software Engineering – Mae Fah Luang University

GPA: 3.90

Languages

Burmese (Native), English (IELTS 7.5), Thai (Basic)
