Profile

Final year software engineering student with strong knowledge of full stack development experiences and competent to work both independently and in group on any projects. Skilled in development and deployment of web and mobile apps using React, Django, Spring and Flutter.

Education

B.Eng. Software Engineering – Mae Fah Luang University

GPA: 3.90

Tech Skills

Programming Languages: Java, JavaScript, TypeScript, Python

Frameworks & Libraries: React, Vue.js, Django, Tailwind CSS, Spring, Flutter
OpenCV, Mediapipe, DeepFace

Databases: MySQL, PostgreSQL, Firebase, MongoDB

DevOps & Deployment: Git, Docker, Gunicorn, Nginx, Google Cloud, Linux VPS, Cloudflare

Design & Tools: Figma, VS Code

Projects

Attendance Checking System (Individual Project) - React, Django, DeepFace (Sep 2025)

- Built a facial-recognition attendance app with Facenet model and geolocation.
- Deployed on Linux VPS using Gunicorn, Nginx, Cloudflare.
- Applied problem-solving skills to achieve the project.

Koalytics (Senior Project) - Django, React, Mediapipe, DeepFace (Jan–Aug 2025)

- Built a remote usability testing platform with real-time emotion recognition.
- Contributed as full-stack developer, collaborating with team members.
- Applied problem solving and critical thinking to combine computer vision with UX analysis.

MFU Hospital Website - Vue.js, Strapi (Aug–Dec 2024)

- Built hospital platform with headless CMS, and contributed by API integrations and frontend development

Koala Tarot App - Flutter, Firebase (Jan–April 2024)

- Built fortune telling tarot reading app, and deployed to Google Play store

Ultimate Tic-Tac-Toe Website - Spring, MySQL, Google Cloud (Aug-Dec 2023)

- Multiplayer Ultimate tic-tac-toe web app, developed by gathering requirements with stakeholders.
