PROFESSIONAL SUMMARY

Recent Software Engineering graduate with 4 months of intern experience in web developer with 4 years of academic projects experience. Skilled in React, Django, Spring Boot with cloud deployment. Developed and deployed multiple websites with suitable usability and security in mind.

WORK EXPERIENCE

Web Developer (Intern)

Trinity Securities Co.,Ltd., Bangkok, Thailand

January 2026 – April 2026

- Developed backend services and database queries for the flight information for 200+ airports with 100,000+ flight paths around the world.
- Developed automated cross-checking flight validation service to check thousands of records of flight data.

EDUCATION

B.Eng. Software Engineering

Mae Fah Luang University, Chiang Rai, Thailand

Graduated: 2026

SKILLS

- Programming Languages:* JavaScript, TypeScript, Java, Python
- Frontend:* React, Vue.js, Tailwind CSS, Flutter
- Backend:* Django, Spring Boot, Expressjs
- Databases:* MySQL, PostgreSQL, Firebase Firestore
- DevOps & Deployment:* Git, Docker, Gunicorn, Nginx, Google Cloud, Linux VPS, Cloudflare
- AI/ Computer Visions:* OpenCV, Mediapipe, DeepFace

PROJECT PORTFOLIOS

- UX auditor platform (Individual work)** React, TailwindCSS, Firebase, Gemini API
 - Built AI-driven UX auditor platform based on Nelson's heuristic and WCAG, used by 200+ MFU software engineering students to check usability of their web interface for assignments
[Deployed-Link](#) [GitHub-Link](#)
- Flight paths searching website (from Internship)** React, Expressjs, PostgreSQL, Docker
 - Developed searchable flight paths together with the flight statistics of every country and airport
 - Responsible for backend development
[Deployed-Link](#) [GitHub-Link](#)
- Attendance Checking System (Individual work)** React, TailwindCSS, Django, REST API, PostgreSQL
 - Built a location-based facial-recognition attendance web app with Facenet model, OpenCV and Geopy to automate attendance tracking and manual clock-in and clock-out for staffs
Showcase Link: [GitHub-Link](#)
- Koalytics (Senior Project)** React, TailwindCSS, Django, PostgreSQL, DeepFace, TensorFlow, OpenCV
 - Built a remote usability testing platform with real-time emotion recognition of participants.
 - Contributed as full-stack developer, and deployed on Linux VPS using Gunicorn, Nginx, Cloudflare.
Showcase Link: [GitHub-Link](#)
- Ultimate Tic-Tac-Toe (Group Project)** Thymeleaf, Bootstrap, Spring Boot, MySQL, Google Cloud
 - Built ultimate tic-tac-toe website which supports 2 players, recording all the previous play rounds score
 - Contributed as backend developer, responsible for spring boot
Showcase Link: [GitHub-Link](#)
- Koala - Tarot (Group Project)** Flutter, Firebase, Google Play Store
 - Developed a tarot reading app with Firebase backend and participated in the Google Play Store deployment process.
 - Built interactive mobile features with Flutter and connected them to Firebase services.
